TRACY SHRESTHA

FRONTEND DEVELOPER

tracysh99@gmail.com 9767245189 linkedin.com/in/tracyshrestha github.com/tracyshrestha

SUMMARY

I am an enthusiastic Frontend Developer with hands-on experience in crafting user-friendly web applications. Proficient in modern frameworks such as React, Vue, and Next.js, as well as technologies like TypeScript and Tailwind CSS. I excel at building responsive interfaces and ensuring seamless backend integration. With a passion for designing intuitive user experiences, I am committed to delivering innovative and impactful solutions.

INDUSTRY SKILLS

- **Frontend:** React.js, Vue.js, Next.js, TypeScript, JavaScript (ES6+), HTML, CSS, Tailwind CSS, Sass, ShadCN/UI
- **State/Data:** React Query (TanStack), React Hook Form, Zod, Axios
- **Tools:** Git, Figma, VS Code, Postman

WORK EXPERIENCE

Mid-Frontend Developer | **Prixa Technologies / TingTing** | **Nov 2025 - Present**

Omnichannel Communication Platform

- Led frontend architecture and development of an ongoing multi-tenant omnichannel communication platform within the TingTing franchise ecosystem using Next.js, React, TypeScript, Tailwind CSS, and ShadCN UI.
- Improved application performance by replacing polling-based chat updates with a WebSocket-driven real-time architecture, enabling instant messaging, notifications, and presence tracking while significantly reducing unnecessary network requests.
- Reduced initial chat page load time by refactoring a monolithic API response into modular, focused endpoints, improving frontend responsiveness and perceived performance.
- Integrated multiple communication channels (Facebook, Instagram, WhatsApp, TikTok, email, web chat) using OAuth authentication flows, enabling a unified inbox for cross-platform customer communication.
- Redesigned and revamped core UI/UX, improving usability, consistency, and workflow efficiency across dashboards, Jira-inspired ticket boards integrated with chat, and tenant management modules.
- Implemented support automation and AI-assisted features including saved replies, configurable AI reply modes, and AI-generated response suggestions for agents, with credit-based usage tracking for AI reply consumption (credit top-up system).
- Developed contact intelligence system with saved contacts, cross-platform identity merging suggestions, and unified customer history across channels.
- Supported multi-tenant RBAC system with roles such as Super Admin, tenant admin, business users, ticket-only users, and guest access, along with single sign-on (SSO) across the franchise ecosystem.

Outbound Campaign Automation Platform

- Led frontend development and enhancements of a live multi-tenant outbound campaign automation platform using Next.js, enabling automated voice, SMS, text, and survey-based campaign execution at scale.
- Delivered a complete UI revamp of the existing platform, redesigning and standardizing core dashboards, campaign flows, and administrative modules to improve usability, consistency, and overall user experience.
- Extended and improved existing campaign workflows by introducing additional campaign variations and execution paths, enhancing flexibility for voice (TTS), messaging, and survey-driven outbound flows.
- Implemented WebSocket-based real-time updates for campaign execution tracking, including status changes, message processing, and upload progress, reducing reliance on polling and improving operational visibility.
- Enhanced campaign analytics and reporting using Recharts-based dashboards, improving visibility into performance metrics, credit usage, and historical campaign execution across tenants.
- Improved multi-tenant authentication and access control flows, including SSO integration and role-based permissions, ensuring secure and isolated organizational access across the platform.
- Optimized campaign creation UX and supporting modules (survey builder, templates, and workflows), improving usability and consistency across the outbound campaign lifecycle.

Frontend Developer Cellapp/ Smartpalika **July 2024 - Oct 2025**

CRM Web Application

- Built user-friendly, responsive frontend interfaces for a client-facing CRM using React.js, Tailwind CSS, and ShadCN UI, as part of a collaborative development team.
- Built dynamic forms with effective state handling and lazy loading to optimize performance and enhance user experience across devices, while supporting efficient development and collaboration.
- Integrated APIs for real-time data synchronization and leveraged Pusher to enable live notifications and display of active users.
- Implemented permission-based access control, allowing role-specific feature access and user privileges.
- Developed a comprehensive activity log system to track individual user actions, with administrative views for monitoring system-wide activity.
- Contributed to building and maintaining customized versions of the CRM tailored for different client organizations, ensuring flexibility and adaptability across use cases.

Portfolio Website (Personal Project) **Sep 2025**

- Built a personal portfolio using Vite, React, TypeScript, and Tailwind CSS.
- Added an animated background with Reactbits and integrated EmailJS for a functional contact form.
- Designed a responsive and user-friendly interface to showcase projects and skills

Trello Kanban Board (Personal Project) **Nov 2025**

- Developed a responsive, React-based Kanban board with drag-and-drop task management, editable tasks, and persistent state using localStorage.
- Implemented clean UI with ShadCN UI, optional filters, and smooth animations using Framer Motion.
- Leveraged TypeScript and Zustand for type-safe, efficient state management.
